EDUCATION

SR University **2021-2025**
Bachelor Of Technology in Computer Science Warangal, India
Current CGPA: 8.4/10

EXPERIENCE

Intrainz **March - April 2023**
Artificial Intelligence Intern Remote, India

- **Leveraged** AI/ML expertise to develop **innovative solutions** for critical domains, including **Fake news detection** and **Breast cancer diagnosis**, during internship at INTRAINZ.
- Utilized cutting-edge techniques, such as **Deep Learning** and **Natural Language Processing (NLP)**, to achieve high-accuracy outcomes in fake news detection and breast cancer diagnosis, showcasing **technical proficiency**.

Orbit Learning **May – June 2024**
Full stack Development Intern Remote, India

- **Designed** and **developed** a scalable **Patient-Centric Healthcare Appointment Management application** using **React** and **Node.js**, ensuring seamless user experiences and high traffic handling.
- **Implemented** HIPAA-compliant features for secure patient data management, appointment scheduling, and provider communication, prioritizing data security and user convenience.

TECHNICAL SKILLS

- **Programming**: C | Python
- **Frameworks**: Django | AWS
- **Web**: HTML | CSS | Java Script
- **Coursework**: DSA | OS | DBMS | CN
- **Databases**: MySQL
- **Tools**: Visual Studio Code, MS word & Power point
- **Source & Version Control**: Github

PROJECTS

PLAGIARISM DETECTION TOOL | PYTHON, TKINTER **Jul 2024**

- **Built** a **plagiarism detection tool** in Python to identify duplicate content.
- Enabled comparison of text files, PDFs, and Word documents.
- **Developed** a user-friendly graphical user interface (**GUI**) using Tkinter for easy content **analysis**.

Healthcare Prediction on Diabetic Patient | **http://surl.li/sysmy** | PYTHON, GOOGLE COLAB, MACHINE LEARNING **Dec 2023**

- **Trained** the model on a large dataset of **healthcare diabetes** to predict the patient with diabetes.
- Achieved a high **accuracy** rate of **73%** in identifying diabetic patient using Random Forest and Logistic Regression **algorithms.**

Portfolio Website | **Portfolio** | HTML, CSS, JAVA SCRIPT **Jan 2024**

- **Crafted** a dynamic portfolio website with intuitive navigation and engaging user interface design.
- Implemented **interactive** elements and advanced features such as animations to captivate visitors and showcase **technical proficiency**.

ACHIEVEMENTS

- Participant in **Hackathon'22** Software and Hardware edition .
- Gained **practical experience** in **Full-Stack** and **Cyber security** topics from the workshops**.**
- Actively participated in 5-day Outreach Program on **Python for Machine Learning & its applications** organized by the centre for Training and Learning**, National Institute of Technology**.

CERTIFICATIONS

- NPTEL certified : Data Base Management System **Sep 2023**
- Cisco Certified : Programming Essentials in Python **June 2024**
- AWS Certified : AWS Academy Cloud Foundations **May 2023**
- Google certified : Foundations of Cybersecurity **Dec 2023**
